

THE PLATINUM SHEET

FRIDAY UPDATE: OCTOBER 19, 2012

One of the resources utilized by handicappers is the public betting information offered by a variety of sources. Leading the way is Sportsbook.com, which offers up this data on both its .net and .com Web sites. Boasting massive sports betting customer databases, Sportsbook.com is able to present statistics that are accurately reflective of public sentiment, and hence useful to the handicapper studying them. These betting trends tell what percentage of bets is being placed on each side of a point spread and total.

This data can be used to profit from. Most "sharps," when given the option, choose to be on the side of the bookmaker, or opposite that of the betting public. However, that side doesn't always win, and some bettors believe in the theory that there is "strength in numbers"—that group would rather follow the big money. By following these betting trends consistently, you'll be able to form your own opinion. Here's a look at some of this week's college football line movement and betting trends so that you can see which way the public is leaning heading into the weekend.

BETTING TRENDS KEY: **Open** = Opening Line **Current** = Current Line **Side** = % of bets on each side of line **Total** = Top line = % of bets on over

10/19/2012 8:00 PM EDT	Open	Current	Side	Total
